Q1.

```python
first_name = input("Enter your first name: ")

last_name = input("Enter your last name: ")

print(last_name + " " + first_name)
```

Output:

```
"C:\Users\jerom\Downloads\Python Prac\.venv\Scripts\python.exe" "C:\Users\jerom
Enter your first name: Jerome
Enter your last name: Daniel
Daniel Jerome

Process finished with exit code 0
```

Q2.

```python
import calendar

year = int(input("Enter year: "))

month = int(input("Enter month (1-12): "))

print(calendar.month(year, month))
```

Output:

```
"C:\Users\jerom\Downloads\Python Prac\.venv\Scripts\python.exe" "C:\Users\jerom
Enter year: 2003
Enter month (1-12): 1
    January 2003
Mo Tu We Th Fr Sa Su
       1  2  3  4  5
 6  7  8  9 10 11 12
13 14 15 16 17 18 19
20 21 22 23 24 25 26
27 28 29 30 31
```

Q3.

```python
from datetime import date

d1 = date(2014, 7, 2)
d2 = date(2014, 7, 11)

difference = d2 - d1
print(difference.days, "days")
```

Output:

```
"C:\Users\jerom\Downloads\Python Prac\.venv\Scripts\python.exe" "C:\Users\jerom
9 days

Process finished with exit code 0
```

Q4.

```python
letter=input("Enter a letter:")

if letter.lower() in "aeiou":
    print(letter,"is a vowel")
else:
    print(letter,"is not a vowel")
```

Output:

```
"C:\Users\jerom\Downloads\Python Prac\.venv\Scripts\python.exe" "C:\Users\jerom
Enter a letter:a
a is a vowel

Process finished with exit code 0
```
